AN OFFER OF SERVICE TO THE ECOLOGICALLY MINDED INDUSTRIAL COMMUNITY

Chemical Control Corporation is continuing to pioneer in the business of waste disposal and has a proven record of having solved many of industry's more difficult problems, particularly in disposal of toxic or other hazardous materials.

We offer a variety of legally approved methods of waste disposal, including incineration, as well as land or sea burial. Our thin film evaporator and high-efficiency packed column are used in processing suitable products for recovery or resale. In many cases, this process could offset the cost of our service to you, and possibly return a profit.

We also own and operate a fully insured fleet of trucks suitable for transporting solid, liquid and/or corrosive materials, as well as the most efficient and economical method of disposing of the material in question.

Please visit our plant, inspect our facilities, and avail yourself of our expert advice. Your inquiries are invited and will be handled in the strictest confidence.

We look forward to the opportunity to be of service to you, and will be happy to provide you with a quotation based on your particular requirements.

Yours sincerely,

CHEMICAL CONTROL CORPORATION
